Dear Josh

We shall be very happy to have Bob and his wife and Dr. Peter Day visit us on Friday, February 25. You know the directions, and so you can direct them to our house at the farm. We have plenty of room there and can put all three of them up for the night provided my sister does not arrive before that time. If she does, I shall be glad to reserve accommodations for them at a motel. Dr. Ogur has been very much interested in these cytochrome deficiencies and will be glad to discuss the matter with them also. I wish that you and Esther could come along as well, but I suppose you are tied up with the usual overload.

Sincerely yours,

Carl C. Lindegren, Director
Biological Research Laboratory
